

MOHAMMED YOUNUS

Aspiring Data Scientist

+91 9652638328 | mohammedyounus.work@gmail.com | linkedin.com/in/mohammedyounus | Peddapalli, Telangana

CAREER OBJECTIVE

Bachelor of Technology graduate (2026) from Jawaharlal Nehru Technological University Hyderabad with hands-on training in Python, SQL, statistics, and machine learning fundamentals through a 4-month Data Science traineeship. Skilled in data cleaning, exploratory data analysis, and dashboard development, demonstrated through multi-table SQL analysis and Power BI visualization projects. Seeking to apply analytical and visualization skills to deliver actionable, data-driven insights as a Data Scientist.

CORE COMPETENCIES

Domain Knowledge: Data Science, Data Analytics

Programming & Data Analysis: Python, SQL, Pandas, NumPy, Matplotlib, Jupyter Notebook

BI & Visualization: Power BI, Zoho Analytics

Tools & Platforms: Git, Figma, AWS (Basics)

TRAINING & EXPERIENCE

Data Science Trainee | SD Hub, Qutubshahi, Hyderabad

4-Month Program (Apr 2026)

- Completed an intensive, hands-on Data Science training program covering Python, SQL, statistics, and machine learning fundamentals, working extensively with practical datasets.
- Executed multi-table SQL analysis on a Swiggy food delivery dataset, querying and joining 6 interconnected fact and dimension tables to extract customer, restaurant, and campaign-level insights.
- Performed data cleaning, filtering, aggregation, and subquery-based SQL analysis to uncover order trends, coupon usage patterns, and campaign effectiveness.
- Delivered a comprehensive analytical presentation using Zoho Analytics, translating raw transactional data into actionable business insights.

Python Programming Intern | Vault of Codes (Virtual)

Nov 2024 – Dec 2024

- Completed a 5-week virtual internship applying Python programming fundamentals to real-world coding assignments and application-development tasks.
- Built 2+ Python applications, including a To-Do List and a Calculator, implementing core programming logic and debugging to meet functional requirements.
- Delivered all assigned programming challenges within deadline, strengthening proficiency in Python syntax, control flow, and application design.

KEY PROJECTS

Swiggy Food Delivery Data Analysis | SQL, Databricks, Zoho Analytics

- Analyzed Swiggy transactional data across a fact-dimension model to understand customer behavior, restaurant performance, product trends, coupon usage, and campaign effectiveness.
- Mapped relationships across 6 interconnected fact and dimension tables (transactions, customer, coupon, campaign, restaurant, product) to structure multi-table analysis.
- Applied SQL techniques including filtering, aggregation, GROUP BY, JOINS, and subqueries to extract cross-functional business insights.
- Summarized findings in a dedicated analytical presentation using Zoho Analytics for stakeholder review.

Food Wastage Analysis Dashboard | Power BI, Microsoft Excel, Kaggle Dataset

- Sourced and cleaned a global food wastage dataset from Kaggle, preparing it for exploratory analysis and KPI identification.
- Developed an interactive Power BI dashboard with multiple KPIs and visualizations to analyze wastage patterns across countries and food categories.
- Enabled cross-country and cross-category comparison through interactive filters, supporting faster identification of major wastage trends for decision-making.

EDUCATION

Bachelor of Technology

Jawaharlal Nehru Technological University Hyderabad (JNTUH) | CGPA: 8.1 | Graduation Year: 2026

CERTIFICATIONS

- Power BI Data Analytics Course — COURSEPE
- Cybersecurity Analyst Certificate — Indo Dutch Cyber Security School
- Oracle Database Programming with SQL — Oracle
- Generative AI — Next Wave
